Practice teaching is an important component towards becoming a teacher. It provides experiences to student teachers in the actual teaching and learning environment. During teaching practice, a student-teacher is given the opportunity to try the art of teaching before actually getting into the real world of the teaching profession. Student-teachers also know the value of teaching practice and they perceive it as the important aspect of their preparation for the teaching profession. Teaching in the classroom is not only the objective of teaching practice, but also to provide training in all activities / work which student teachers are going to perform in future during their job. For this purpose they have to spend whole day in school as teacher. They have to participate in all the activities of school e.g evaluation of class work and home work, arrangement of tutorial groups, sports / games, morning assembly, co-curricular activities, duty during recess, duty as day master, duty before and after school timing, in look after and arrangements of A V aids room, science laboratories and library. Various programmes were organised by the Student teachers in the teaching practice schools like day celebrations, competitions etc.

The School Internship Programme for the Senior Batch students conducted from 17th November 2021 to 15th March 2022. As the Covid restrictions had been lifted, the Internship programme was conducted in offline mode.
